

GENETICS, JOKE

10 COMMANDMENTS

11.09.2006

1. There is only one human genome.
2. You should not misuse it for any other purpose than continuing human lineage
3. Observe the order of exons and introns and nongenic sequences.
4. Recognize recombination and preserve it for a long lifespan.
5. Do not knockout genes.
6. Do not mix genomes.
7. Do not steal sequences from other genomes.
8. Do not assign wrong functions to genes.
9. Do not use chromosomes in other cells.
10. Do not be jealous on your neighbours sequence nor on your neighbors wife sequence nor on your neighbours children sequence.

Yea, yea.
