GENE LISTS BY AUTOMATIC LITERATURE EXTRACTION

27.11.2006

Just found at the HUM MOLGEN bulletin board a [link](#) to Fable, a new automated literature extraction system. Fable is pretty fast and can output gene lists. Sure, the screenshot below shows only those genes that I mentioned in the abstract, but this is not so bad as the most important genes will be placed there.

BTW, the number of reviews on asthma genetics have been falling to less than 50% after closing the Asthma Gene Database. Maybe this new service will help to re-establish the former output of reviews ;-) yea, yea.

The screenshot shows a window titled 'Fable' with a table of extracted genes. The table has several columns, including gene names and associated data. The genes listed include: *IL13*, *IL13RA1*, *IL13RA2*, *IL13RB1*, *IL13RB2*, *IL13RA1L*, *IL13RA2L*, *IL13RB1L*, *IL13RB2L*, *IL13RA1L2*, *IL13RA2L2*, *IL13RB1L2*, *IL13RB2L2*, *IL13RA1L3*,
