HELICOPTER EPIDEMIOLOGY

27.11.2006

Already at the very early beginning of my career I have been told about the dangers of “armchair” epidemiology – researchers only managing studies. There seems to be even another extreme, called “helicopter epidemiology” as pinpointed in the [Lancet](#) recently

...fly into a remote location containing “interesting individuals”, collect descriptive data and biological specimens, fly out, process, and publish the information elsewhere... , collect descriptive data and biological specimens, fly out, process, and publish the information elsewhere...
