

GENETICS

A REVIVAL OF DNA POOLING

22.12.2006 1 COMMENT

My interest in DNA pooling was always strong; we have developed [methods](#) doing this on the mass spec platform and applied it to the [HLA region](#). I had, however, doubts if testing pools by less accurate methods like chip hybridization will work. The January issue of the [AJHG](#) now has a fascinating article how pooling may even work on the Affymetrix platform. Yea, yea.

Addendum

DNA pooling can be even used in family context, see Wen Chung Lee in Cancer Epidemiology 2005 or Neil Risch in Genome Research 1998.
