ANYTHING BETTER THAN IMPACT FACTORS?

5.02.2007

Here is a nice inside view from the BMC journals – you can watch how often your own papers are being downloaded.

The screenshot shows the BioMed Central website interface. At the top left is the BioMed Central logo with the tagline 'The Open Access Publisher'. To the right is a banner for a 'FACULTY OF 1000 MEDICINE' with a 'CLICK HERE FOR YOUR FREE 3-WEEK TRIAL' button and the website 'www.f1000medicine.com'. Below the banner is a navigation menu with links: home, journals A-Z, subject areas, advanced search, authors, reviewers, libraries, jobs, about, my BioMed Central. The main content area is titled 'Article access statistics' and features the article 'Target SNP selection in complex disease association studies' by Matthias Wjst, published in BMC Bioinformatics 2004, 5:92 (12 July 2004). It provides links for Abstract, Full text, PDF, PubMed, and Related articles. The statistics show 4405 total accesses and 73 accesses within the last 30 days. A note states that access figures include full text, abstract, and PDF downloads. Below this is the 'Article citation statistics' section, which indicates the article has been cited twice by other articles on the site.

Hopefully these hits are not only generated by search engine spiders, yea, yea.
