Current revision (12:08, 22 February 2007) (edit)
Hiram Whickermeister III (Talk | contribs)
(Reference to The Bell Curve removed so no one will think this article is racist.)

<p>Line 1:</p> <div style="background-color: #ffff00; padding: 5px;">A section of [[DNA]] that codes for the production of a [[protein]] or a portion of a protein. The gene is the fundamental unit of heredity.</div> <p>-</p> <div style="background-color: #ffff00; padding: 5px;">Although the gene is the fundamental unit of heredity, changes in genes (so-called "[[evolution]]") cannot explain the differences between [[species]], which require an [[intelligent design Intelligent Designer]]<ref>Davis, Percival & Dean H. Kenyon, "Of Pandas and People: The Central Question of Biological Origins"</ref>. Genes do, however, explain the differences in intelligence and academic performance between different races<ref>Herrenstein, Richard J. & Charles Murray, "The Bell Curve: Intelligence and Class Structure in American Life" </ref></div>	<p>Line 1:</p> <div style="background-color: #90ee90; padding: 5px;">A section of [[DNA]] that codes for the production of a [[protein]] or a portion of a protein.
