# DOCTOR HELP YOURSELF

1.03.2007

Physicians do have a lower life expectancy than the average population – which argues somewhat against the health (some believe also [disease](#)) expertise of physicians. [ZEIT](#) magazine now has an article about “Guter Arzt, kranker Arzt”. It is about the hierarchic system in German hospitals, the daily indignities, the long working shifts and the hope that this will improve by climbing the next step of the career ladder.
