SEARCH FOR CRYSTALS

13.04.2007

[First monday](#) has an interesting paper on the 100 most visited Wikipedia pages for the period of September 2006 to January 2007 (Wikipedia is the ninth most visited site in the U.S. with 43 million visitors). The crystal search link in the paper does not work but the table reports that science ranks at place 5 - not too bad.
