

GENETICS, SOFTWARE

# AND NOW ALL TOGETHER

18.09.2007

A quick [update](#) of my DNA pooling studies: The Affymetrix Genotyping Console 1.0 now includes a parameter CONTRAST that looks damned good to be used for estimating relative allele scores.

Here is the distribution of contrast values for a single hapmap individuum showing homozygotes on the left, heterozygotes in the middle and opposite allele homozygotes on the right.
