

JOKE

SCIENCE OF THE SURF

7.11.2007

Don't confuse me with Science of the Surf – although I like that academy too...

The banner features a yellow background with two circular logos on the left and right. Each logo has a red outer ring with the text "Science of the Surf" and a blue inner circle with a white wave. In the center, the text "Science of the Surf (SOS)" is written in large black letters, with "An Educational Program for Beach and Surf Safety" in smaller black letters below it.

Beaches are our natural playground so it may surprise you that an average of 60 people a year drown and thousands more are rescued on Australian beaches alone. This is largely due to a lack of understanding by the general public to the dangers present on beaches. The Science of the Surf (SOS) program addresses this problem by providing a basic scientific understanding of the way that beaches, waves and rip currents work. A visually powerful and entertaining talk is available to schools, local councils, and community and corporate groups.

School Seminars
SOS seminars are certified by the NSW Department of Education and last for 45-50 minutes. Separate versions are suitable for Years 3-6 and 7-12.

The banner also includes a central video player showing a person surfing, a small "Adblock" button, and a photo of a seminar in progress.
