PHILOSOPHY

WE NEED INDEPENDENT REPLICATION

26.11.2007

We always need replication in scientific studies. I therefore canÂ't understand why there is now such a <u>fuzz in Nature</u> as they

... took the unusual step of soliciting an independent verification of the paper during the process of peer review. This is the first time that Nature has obtained second-party replication ahead of publication.

this could have saved thousands of dollars if it would have been also applied to other studies before, yea, yea.
