# PRERELEASE: A UNIVERSAL STUDY DATABASE ENGINE

7.12.2007

Last night I completed the prerelease of a new database engine that may be used both for online and offline collection of interview data and laboratory values. The central database can deliver pages to the internet but may be at the same time accessed by Open Office to create nicely formatted printed questionnaires.

The system is easy to set up by just copying 2 packages to a directory. It supports data collection at multiple sites (with SSL) and works both with Firefox and IE.

Report functions for single individuals and for study center have been largely reconstructed while the engine remains ultrafast by an innovative database design, by using pure JAVA byte code of the embedded server and by restricting to text output. The current version includes also a web-based edit of variables and a script for regular backups.

1.Login	2.Proband	3.Enter Data	4.Print	Tracking	Center	Study	Admin
user	Your center		Gauting Warwickshire other				
proband 100	Is this a case or control?		<input type="radio"/> case <input checked="" type="radio"/> control				
7.12.07	If a case in which COPD class?		<input type="radio"/> I <input type="radio"/> II <input checked="" type="radio"/> III <input type="radio"/> IV				
Registration [OK]	Has been given Informed Consent?		<input checked="" type="radio"/> yes <input type="radio"/> no <input type="radio"/> unknown				
Questions I	Current status of entry		registered examined ready				
Questions II	Comments on current status (dropout reasons etc.)						
Questions III							
Serum lab							
Lung function							
Bronchoscopy I							
BAL lab							
Genotypes							
RNA							
Tracking							
File Upload			save >>				

Let me know by personal mail if you want this package for beta testing.
