

GENETICS, SOFTWARE

WIKIPATHWAYS

9.08.2008 1 COMMENT

As somebody who is dealing most time with large datasets I always arrive at genes and proteins that I do not know. Using Biocarta, Keggs and other services in the past, I find the new [WikiPathways](#) exciting and hope that it will grow over the years. A [companion paper in PLoS biology](#) describes its roots in GenMAPP and the current work of the authors on bots that identify inconsistencies but also pick up loose ends. Hopefully I will find some time to work a bit on [nuclear receptors](#), yea, yea.
