

GENETICS, THEOLOGY

THE LARGEST EXPERIMENT OF THE WORLD

10.09.2008

Physics gets now a lot of attention with the largest experiment ever done with the [LHC \(pictures+data\)](#).

- * largest machine (26.659 m diameter)
- * largest freezer (60 tons helium)
- * fastest runaway (99,99999 % speed of light)
- * highest energy consumption (7 TeV)
- * most lonely place - vaccum (10^{-13} at)

- * hottest place 100.000-fold temperature of the sun
- * coldest place on earth ($-271,3^{\circ}\text{C}$)
- * largest [supercomputer](#)

Congratulations from the biomedical field that produced [much less records in this week](#).
