

ALLERGY, PHILOSOPHY

PRAY TELL US WHAT YOU DO

19.02.2009

I already suspect that science has more to do with beliefs than religion. However, only very recently I came across this paper (when working on [eosinophils](#)) that stretches this view to its limits: ["Eosinophil cells, pray tell us what you do!"](#) Or is that a new incarnation of Spinoza's God in Nature?
