DO WE NEED SCIENTIFIC JOURNALS AT SOCIAL NETWORKS?

7.01.2010

It is interesting to see, how journals are trying to increase their market visibility – Nature has becoming famous for their investment in Second Life? Just recently I received an email that JACI – the Journal of Allergy and Clinical Immunology – has now opened an account at Facebook.

Journal of Allergy and Clinical Immunology Treatment for allergic rhinoconjunctivitis is mainly focused on treating the symptoms, but a study published in the Journal's January issue shows how treatment with a grass allergy immunotherapy tablet over a three-year period resulted not only in clinical improvement of symptoms but also immunologic changes that were ...
