

JOKE, SOFTWARE, VITAMINS

TEAR DOWN THE WALLS

24.01.2010

What happens when looking at that video?

The neuroanatomy view [this week in Nature](#)

we predict[...] a macroscopic signal visible to functional magnetic resonance imaging (fMRI) in humans. We then looked for this signal as participants explored a virtual reality environment, mimicking the rats' foraging task: fMRI activation and adaptation showing a speed-modulated six-fold rotational symmetry in running direction. The signal was found in a network of entorhinal/subicular, posterior and medial parietal, lateral temporal and medial prefrontal areas.
