

JOKE, SOFTWARE

A LIVING DESKTOP FOR SNOW LEOPARD

7.07.2010

There are certainly a zillion ways how to do create a nice background for your Mac. Here is my favorite method of a weather forecast, an individual calendar and the most recent emails. I created just three geeklets and loaded them in [Geektool](#).

The most difficult part turned out to get the weather icon from Yahoo! With a little help from several sites I ended up with the following code for Munich
