NEW: POSTS WILL EXPIRE

27.02.2014

There is a nice WordPress Plugin (screenshot)

Post Expirator

Allows you to add an expiration date to posts which you can configure to either delete the post, change it to a draft, or update the post categories.

The Post Expirator plugin allows the user to set expiration dates for both posts and pages. There is a configuration option page in the plugins area that will allow you to seperately control whether or not posts/pages are either deleted or changed to draft status. Additionally you can also choose to have the post categories change at expiration time. If you choose to change the post category, the default action of changing the status will be ignored.

Requires: 3.7 or higher
Compatible up to: 3.8.1
Last Updated: 2014-2-20
