

PHILOSOPHY

PHANTOM REFERENCE

19.11.2017

There is an interesting story at harzing.com: A conference template with a dummy reference, that was supposed to be edited by abstract authors, was finally cited by 400 authors :) I find even more citations at [Google Scholar](https://scholar.google.com), 703 to be exact. Low quality, missing control, careless editing, and fake journals, creepy...
