

ALLERGY, VITAMINS

VDR VARIANTS ARE ASSOCIATED WITH ASTHMA

26.10.2019

It is always nice to see an own study 15 years later appearing in a meta-analysis. [A new paper in the Annals of Allergy, Asthma and Immunology](#) now shows the results of 17 case-control studies.

Pooled odds ratio (OR) and 95% confidence interval of individual studies and pooled data for the association between Taq1 polymorphism and asthma risk in overall populations and B for tt vs. TT of the Taq1 variant.

We are in line #1...

Another nice paper on a genetic interaction is Vimalleswaran et al.

ORIGINAL ARTICLE EPIDEMIOLOGY AND GENETICS

Evidence for a genetic interaction in allergy-related responsiveness to vitamin D deficiency

K. S. Vimalleswaran, A. Cavadino & E. Hyppönen

Centre for Paediatric Epidemiology and Biostatistics and MRC Centre for the Epidemiology of Child Health, UCL Institute of Child Health, London, UK
