BETTER THAN A STREAMDECK: THE MAC TOUCHBAR

1.11.2020

I have been thinking to buy an Elgato Streamdeck as we have to lecture now also online during winter 2020.

While the Streamdeck mini would be a nice addition to the [Elgato 4 K Camlink](#) (that connects the Nikon) as well as the [Epic Cam software](#) (that connects the Iphone) for easy switching input channels, I ultimately decided against this solution and just reconfigured the Touchbar for [OBS](#) using [Better Touch Tool](#).
