BETTER THAN A STREAMDECK: THE MAC TOUCHBAR

1.11.2020

I have been thinking to buy an Elgato Streamdeck as we have to lecture now also online during winter 2020.

While the Streamdeck mini would be a nice addition to the <u>Elgato 4 K Camlink</u> (that connects the Nikon) as well as the <u>Epoc Cam software</u> (that connects the Iphone) for easy switching input channels, I ultimately decided against this solution and just reconfigured the Touchbar for <u>OBS</u> using <u>Better Touch Tool</u>.
