

SOFTWARE

FROM MARKDOWN TO BOOKEND AND BACK

13.01.2022

When writing text in [Typora](#), I need Bookends to insert references.

Export to RTF format for creating the bibliography isn't a big deal but using the new RTF in Typora needs [Pandoc](#) on the command line as Typora's import function is broken.

```
brew install pandoc
pandoc --wrap=none --extract-media=images -f rtf -t markdown
myfile.rtf -o myfile.md
```

Seems that pandoc destroys footnotes and inline images making this combination not a first choice for larger documents.
