# GOOD SCIENTIFIC GRAPHICS

5.01.2022

I have lectured about good graphics more than a decade ago – basically introducing Edward Tufte as the “Leonardo da Vinci” of data. With the beginning of 2022 I am now absolutely overwhelmed by the number of excellent tutorials out there. Here is my recommended list

- best book ever: Chun-houh Chen, Wolfgang Härdle, Antony Unwin (eds) Handbook of Data Visualization, Springer 2008 ([don't worry about 2008!](#))
- tutorial: [A GGLOT2 tutorial for beautiful plotting in R](#)
- cheat sheet : [R Studio](#)
- big data: [chapter](#)
- gallery: [graph-gallery.com](#)
- bonus: [generative art](#) or [artsy](#)
