DEATH BY AI

16.08.2022

spiegel.de reports a fatal accident of a self driving car.

In Kurve auf Gegenfahrbahn geraten
Ein Toter und neun Schwerverletzte bei Unfall mit Testfahrzeug
Vier Rettungshubschrauber und 80 Feuerwehrleute waren im Einsatz: Bei
einem Unfall auf der B28 im Kreis Reutlingen starb ein junger Mann,
mehrere Menschen kamen schwer verletzt ins Krankenhaus.

Is there any registry of these kind of accidents?

···

A friend just shared this with me. A great example for how deep learning models struggle with out-of-distribution data.
I wonder how many carriages the model has seen during training 😅

and the discussion on responsibility

The first serious accident involving a self-driving car in Australia occurred in March this year. A pedestrian suffered life-threatening injuries when hit by a Tesla Model 3, which the driver claims was in "autopilot" mode.
In the US, the highway safety regulator is investigating a series of accidents where Teslas on autopilot crashed into first-responder vehicles with flashing lights during traffic stops.
