# INITIAL DATA ANALYSIS

31.08.2022

Here is my favorite R list of packages

```
library(DataExplorer)
plot_str(iris)
plot_bar(iris)
plot_density(iris)
plot_correlation(iris)
plot_prcomp(iris)
```

see also

```
devtools::install_github('https://github.com/paulvanderlaken/ppsr')
score(iris, x = 'Sepal.Length', y = 'Petal.Length', algorithm =
'glm')[['pps']]
```

while for robustness of models I use

```
devtools::install_github("chiragjp/quantvoe")
library(quantvoe)
```

Python versions come [here](#) or [here](#).
