

PHILOSOPHY

NO BIG IMPACT BUT RECOGNITION

30.12.2022

As a part time ethicist I am quite happy if an earlier article [gets some recognition](#). Recognition is something different to the craziness of summing up impact factors, it is some kind of payback by longterm influence.

This article is in the 91st percentile (ranked 15,756th) of the 181,030 tracked articles of a similar age in all journals and the 99th percentile (ranked 1st) of the 3 tracked articles of a similar age in *BMC Medical Ethics*

Altmetric calculates a score based on the online attention an article receives. Each coloured thread in the circle represents a different type of online attention. The number in the centre is the Altmetric score. Social media and mainstream news media are the main sources that calculate the score. Reference managers such as Mendeley are also tracked but do not contribute to the score. Older articles often score higher because they have had more time to get noticed. To account for this, Altmetric has included the context data for other articles of a similar age.
