How was your experience of publishing 'High variability of COVID-19 case fatality rate in Germany'?

Dear Matthias Wist,

Congratulations and thank you for choosing to publish in BMC Public Health.

We understand that publishing your findings is a crucial stage of your research. And we aim to serve you to the best of our ability during this important process.

Let us know about your recent experience, so we can learn what we're doing well, and where we need to improve for future publications.

Click here to tell us what you think!

OK, here we are, it was a nightmare <u>from the preprint</u> in April 2021 with basically 100 emails until the <u>publication</u> in March 2023.
