STACK OVERFLOW IMPORTANCE DECLINING

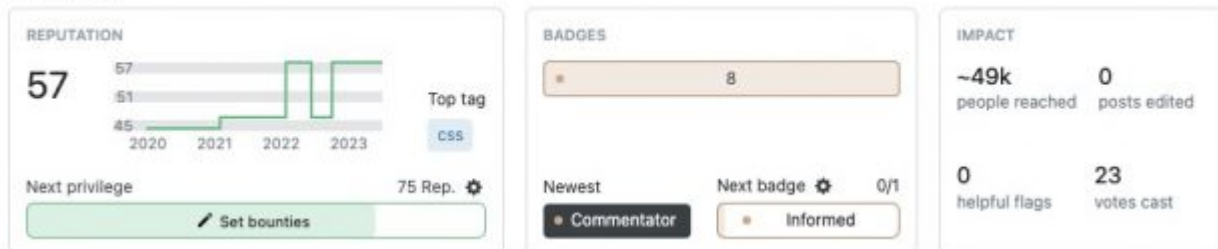

2.08.2023

newsletter.devmoh.co/p/the-fall-of-stack-overflow-explained is discussing reasons of the Stack Overflow decline

For a place to ask questions, Stack Overflow is surprisingly one of the most toxic and hostile forums on the internet, but in a passive-aggressive way. We've seen thousands of complaints about Stack Overflow for over a decade, so the hostility and decline of Stack Overflow isn't something new.

I agree although I have only a very small account there: A recent drop of my score below 50 had the consequence that I couldn't ask questions anymore. Funny enough, the score jumped back without any interaction.
