

NOTEWORTHY, PHILOSOPHY

# WHEN THE EMPIRE STRIKES BACK

7.11.2023

The Francesca Gino case is now well known [1, 2]. But this is something [never seen before](#), a mass self-auditing effort to prove the honesty of the co-authors

More than 140 collaborators of Francesca Gino, the Harvard Business School professor who has been accused of data fabrication, have been scrambling to verify the research that they've published with her. On Monday, they started making their findings public.

The mass self-auditing effort, called the [Many Co-Authors Project](#), has already initiated the retraction of at least one paper that Gino collected data for, according to one of her collaborators.

Many Co-Authors

At [the end](#) it is about sleeping tonight

**Joe Simmons**

@jpsimmon

Gino's case against us has been dismissed.

Scientists cannot effectively sue other scientists for exposing fraud/errors in their work.

Those who work to correct the scientific record can sleep better tonight. Those who don't want it corrected, well, I don't care how they sleep.
