THE GOGGLE GEMINI VIDEO A FAKE?

8.12.2023

techcrunch.com/2023/12/07/

Just one problem: the video isn't real. "We created the demo by capturing footage in order to test Gemini's capabilities on a wide range of challenges. Then we prompted Gemini using still image frames from the footage, and prompting via text." (Parmy Olsen at Bloomberg was the first to report the discrepancy.)

It doesn't even give more confidence if [Oriol Vinyals](#) now responds

All the user prompts and outputs in the video are real, shortened for brevity. The video illustrates what the multimodal user experiences built with Gemini could look like. We made it to inspire developers.
