PHILOSOPHY

AUTHORITARIANS THRIVE ON DATA

10.04.2025

Only this morning did I realize that the book of Götz Aly <u>has also been published in English</u> with <u>a preview</u> at Google books

"Nazi Census" documents the origins of the census in modern Germany, along with the parallel development of machines that helped first collect data on Germans. Or read <u>IBM and the Holocaust</u> which has more details on IBM's conscious co-planning and co-organizing of the Holocaust for the Nazis.

Why should you read that? Not because of Nazis but because authoritarians thrive on data. Here are todays news

-1-

US plans to merge all government data. A large-scale effort, <u>led by Elon Musk's team</u>, aims to link federal databases — raising serious concerns among privacy and security experts.

-2-

<u>U.S. Citizenship and Immigration Services</u> begin screening immigrants' social media accounts as grounds to deny visa and green-card applications.

-3-

Here is an <u>article</u> from the Dean of the UC Berkeley Law School Erwin Chemerinsky and the emeritus Harvard constitutional law professor Lawrence Tribe about the consequences: "We should all be very, very afraid".
